恒星の進化 (3)

7.1 恒星進化の方程式

7.2 恒星進化の計算

Hertzsprung-Russel diagram (HR)

Luminosity (L_{sun})

Temperature (K)

さまざまな疑問を**物理**を使って理解しよう

- 星の中はどうなっているの？
- なぜ重い星の方が大きいのか？
- なぜ星は明るく輝くのか？
- なぜ重い星の方が明るいのか？
- なぜ星は「進化」するのか？
- なぜ質量で星の運命が変わるのか？
- なぜ星は星でいられるのか？
- なぜ一部の星は爆発するのか？
- ...

Why a new 1D stellar evolution code?

The MESA Manifesto discusses the motivation for the MESA project, outlines a MESA code of conduct, and describes the establishment of a MESA Council. Before using MESA, you should read the [manifesto document](#). Here's a brief extract of some of the key points

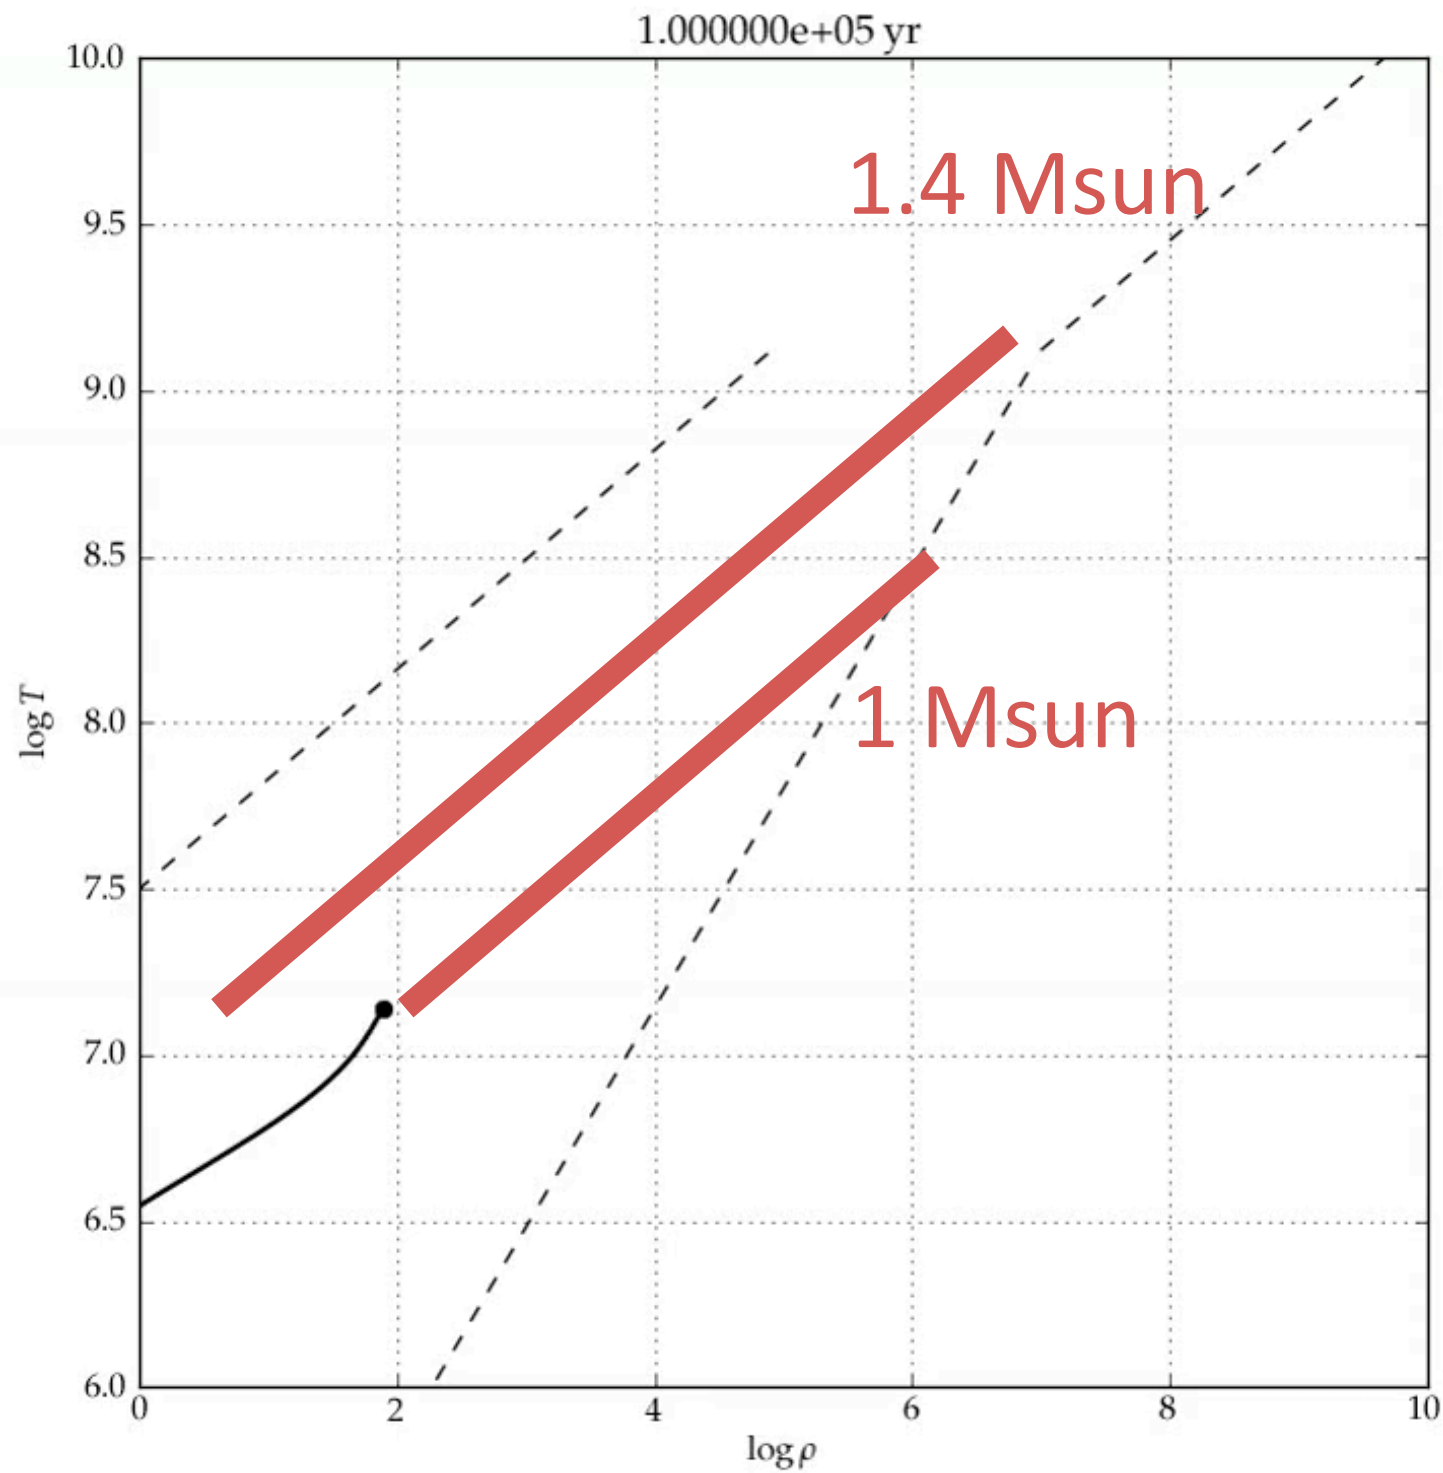

Stellar evolution calculations remain a basic tool of broad impact for astrophysics. New observations constantly test the models, even in 1D. The continued demand requires the construction of a general, modern stellar evolution code that combines the following advantages:

- **Openness:** anyone can download sources from the website.
- **Modularity:** independent modules for physics and for numerical algorithms; the parts can be used stand-alone.
- **Wide Applicability:** capable of calculating the evolution of stars in a wide range of environments.
- **Modern Techniques:** advanced AMR, fully coupled solution for composition and abundances, mass loss and gain, etc.
- **Comprehensive Microphysics:** up-to-date, wide-ranging, flexible, and
